Permanent Waves

Texture and curls are better than ever. Perms are gentle and kinder to the hair. You can even have a color treatment on the same visit. They are perfect for lift, support, and adding bounce to your style.

Relaxers

This treatment is ideal for relaxing a tight or kinky curl, making it softer or creating a larger wave.

Permanent Tint

Permanent color is the best choice for gray coverage. This color choice allows you to go up to four shades lighter than your natural base, or as rich and deep with color as you like. Permanent color lasts longer and is more fade resistant. Maintenance is needed every four to six weeks.

Semi-Permanent Tint

This is tone on tone color, which usually means your natural hair color or going darker. This color choice adds lots of body and shine.

Demi-Permanent Tint

This color washes out in four to six weeks. A terrific lunch time treat to introduce you to color with no commitment.

Highlights or Lowlights

Highlights and Lowlights are a weaving technique used to isolate strands of hair. The idea is to separate the strands from the rest of your natural color and lighten or darken them to provide contrast and spark. Easy maintenance.

Corrective Color

Our expert color staff can correct brassiness, chemical damage or home hair color that has gone wrong. Our methods include matching tones, lowlights, and blending.

Thermal Ionic Straightening System

This is a permanent straightener formulated with Natural Ion Complex to effectively straighten all hair types without the damage of conventional straighteners.

The breakthrough formula restores and revitalizes the hair to a healthier condition, leaving the hair smooth and silky with incredible shine. It is safe for most chemically treated hair, brightens color and sheen and requires minimal effort when blow drying.
